

Head of Quality Unit (m/f)

Site Tittmoning, Germany

With a planned revenue of around 750 million euros for the current fiscal year, the Aenova Group belongs to the global leaders in the pharmaceutical and healthcare industry. The range of services of the Group comprises the entire value-added chain of development and production for all major dosage forms and product groups for the fields of medicines and dietary supplements. By its high standards of quality, innovative technologies and a clear focus on the future, Aenova has developed to become Europa's market leader in business-to-business. The Group, with its headquarters close to Munich, operates 24 locations worldwide in eleven countries. More than 4.300 employees contribute to the success of the Group.

Main Tasks

- Provide strategic and technical leadership in all quality related matters ensuring smooth realization of Dragenopharm projects and a successful start-up of the new manufacturing line
- Ensure that all quality aspects during the design, qualification and start-up phase allow for safe and efficient operation and meet all relevant cGMP regulatory requirements and AENOVA (Parent Company of Dragenopharm) guidelines
- Design, build and develop the quality unit including hiring and training appropriately qualified staff
- Proactively manage interfaces of existing quality functions to ensure timely project support
- Contribute to the development and successful implementation of the Quality Systems
- Support execution of the technology transfer, qualification and validation activities of production systems and all associated equipment
- Contribute to establishing annual budgets and ensure that the budget is not exceeded
- Support frequent project quality assessments and development of CAPAs
- Ensure that procurement of raw materials, components, software, equipment and use of contractors and service providers are in accordance with requirements and the AENOVA guidance
